### Opis produktu

Specjalna torba do przechowywania pakietów Li-Po wykonana z materiału odpornego na działanie wysokich temperatur. Znacząco zwiększa bezpieczeństwo przechowywania i transportowania ogni i pakietów Litowo-Polimerowych.

**Wymiary: 18 x 22cm**

#### Oryginalny opis:

The LiPo Safe is a hi-tech bag made of space-age materials that has the ability to contain a lithium polymer battery fire or charging mishap. Place your lithium polymer battery inside the LiPo Safe and extend the charging wires through the top flap. Charge the lipo batteries when they're in the LiPo Safe for peace of mind and greater safety. In the case of a lithium polymer battery charging mishap, the LiPo Safe's fire-resistant material mitigates the ferocity of the LiPoly blaze inside and vents the smoke outside the LiPo Safe.

The LiPo Safe is sealed with a thick, industrial strength, Velcro flap. The current LiPo Safe is designed to handle a lithium polymer battery mishap from 1 to 6 lipoly cells (1s to 6s).
